

Volrac Games Manual

By: CarloV

Bingo

Bingo is the first game on Volrac, and is still loved by certain people, Volrac is telling people to get a bingo card, when that is done, it will be saying certain ball numbers every round, and when you see your ball number roll out, you must say **!check**. when all numbers on your card are checked, you must say **!bingo**, and the game is done!

Pow!

Pow is a game, where the idea originates from Juan, who posted a chatgame idea on getsatisfaction: http://getsatisfaction.com/omgpop/topics/new_chat_game_pow. It is very simple, Volrac says a word and you repeat it!

Variations to Pow:

!woP

Instead of repeating the words of Volrac you need to reverse them

PwOoP

instead of repeating or reversing words, you need to unscramble them

Swoop

This game makes Pow! more of a speed game, it only gives words of 3-6 letters this time. Including strange and rare words!

ABC POW

This version of pow tells you to write down a word in alphabetic order

WOP CBA

Same as ABC POW, but then in this case the alphabetic order is reversed

E = M Pow²

This is a Version of Pow which includes basic math (+ , - , × , ÷)

Polor

This is actually just Pow where you need to guess the color of a word

LetterBlox Extreme

This game is a chatgame version of Letterblox, you will get a whole bunch of letters, and you need to make as many words as possible from it!

Shootout

This game is a dueling game, first everyone gets asked to get a gun, by saying **!gun**. Then random duels appear, to win a duel, be the first to say the appearing command!

Battlefield

Very confusing when you do it for the first time, It is a wargame where everyone can join in when they want. The rules are simple, just perform as many succesful actions as possible (this includes suicide). When you fail a certain attack, or you get attacked yourself, you will lose points. You can attack someone by saying the command followed by an arrow up or down. examples of good commands are: **!jab ^**, **!punch v**, which respectively symbolize a jap upwards and a punch downwards. Also note that a suicide attack should be directed as well!

Unscramble

This game also played by Panda, is simply about unscrambling words. the more words you unscramble, the more points you get!

Labyrinth

You are dropped in a maze, blindfolded. The only thing you can do is go **!left**, go **!right**, go **!up**, or go **!down**. To get out of the maze try to use the messages, to guide you through.

Lottery

Also played by Panda allot, you say **!lottery** and you will in the lottery, at the end of the countdown, 10 people will be picked to win!

Rock Paper Scissors

Mostly abbreviated by **RPS**. first Volrac will tell you to enter the tournament by saying the command **!rps**. Then Random Duels will appear, to stay anonymous, type your decision in the chatwindow popping up!

Xtreme Rock Paper Scissors

same as RPS, with a few added commands, to make things more fun!

Mix My Story

Also known as **MMS**, this also needs people to be participating first round, by saying **!story**. now a new chatwindow will appear to give a secret word. When you have chosen a secret word, just watch Volrac tell a story. If your word passes by, then you can change it. The objective of the game is to make original words. Originality is calculated by using occurrences of letters in all words. If you for example use the word **apple** and someone else uses **pear**. then pear would be found more original, since the **p** appears 2 times in apple, but only 1 time in pear. All other letters appear as often so they wont make a difference to originality now.

Quiet

A game with one simple rule: *"be quiet for a certain amount of seconds"*. After being quiet for so long, just say a random word and you are registered. 10 seconds after the quiet time should be over, the results start to play.

GreedyPig

To win this game, you cant be too greedy, but also not too cautious. It's all about taking risks. First Volrac will ask you to enter the game and be a greedypig, to join say **!pig**. After that all rounds start. When you **!sit** you dont take any risk, but it also means you dont get any points either. When you **!stand** you risk getting eliminated, but it does give you points. How to get eliminated? Well every round Volrac is rolling a 6-numbered dice. When Volrac rolls **1** then everyone that is standing will be eliminated, for all other numbers you will get points!

Guess That Lyric

Also known as **GTL**. This game is very simple, a lyric of a certain song will show up and people need to guess how the song continues.

Loverly

A cute dating game, first everyone needs to join the game for a dating session by saying **!date**. After that Volrac will make couples, then 3 things can happen, if both people say a command, then they will get a lovescore. If only one says a command, then the person is left behind. If noone says anything, they will not be made for eachother at all. The lovescore is calculated by being "*equally minded*". Which means saying the same command at the same time, will give you 100% score.

Summon

Small game derived from a chatgame made by Genes1s. A person, thing, object, etc. gets picked and is summoned into the arena, now all people must attack that object, until it is weakend enough to be captured. The first person to capture it, wins!

Trivia

You will get questions in certain categories, the more you answer correctly, the more points you get!

Scrambivia

Trivia game where all answers are scrambled and shown, to make it easier

King Of The World

Also known as **KOTW**, to join you must say **!king**, and you will be assigned a country, with this country you need to take over the world! You can do that by saying **!attack small** to attack a smaller country, or take a bit more risk and **!attack big** to attack a big country. Also you can defend your country by saying **!defense** this will make you invulnerable until you get

attacked, or attack yourself. When you are attacked by someone else, you can say **!attack back**. To take some revenge.

Add Me Up

A Math Game, this is not about getting the answer exactly right, its about guessing the answer as good as possible, as fast as possible. The math starts out very easy, but gets harder each round, to win try to guess the answer thereby!

Me No Speak That

also known as **MNST**. A language translation game, just translate the certain words to normal words!

This Game is out of order right now!

Poll Positions Lite

Better known as **PPL**. This game gives people questions having multiple answers. You get most points for answering the best of them!

Tag Your Itz!

A simple game, saying something gives you 1 point, but it also makes you risk being tagged and lose all your points. Thereby winning the game doesnt imply you should spam the chat! When you are a tagger, say **!tag ^** or **!tag v** , just like in battlefield, to tag people.

Chainage

Some words, are just glued together, like **TimeBomb**, here **Time** and **Bomb** are separate words as well. Using this feature when Volrac says **Time** you must say a word that will fit behind **Time**. like the word **Bomb** would be a possibility then! Then the next word to chain is **Bomb**. Since **BombSquad** is a word as well, we can say **Squad**, creating the second combo. Every Combo you gives more points!

Defuse

There is a bomb hidden each round, you need to defuse using some commands, too bad not every command is a right command!. You have only 1 extra life in most cases. So be careful!

Urbanned

Like trivia, but using urbandictionary for it, filtering out all bad words of course!

Quootz

A famous quote is given with pieces left out, and people need to guess which words are left out from the quote!

Spin the Bottle

Also played by Panda sometimes, this game is not about the points, but more about love, It's similar to Lottery and Lovers together!

Chatamari

This is a Katamari-like chatgame. Actually you roll down the chat, obstacles are shown on the screen also each having a certain size. So **!roll**, **!stop**, or **!jump** at the right time. Also you can **!attack** a random person when you think you are big enough!

Chaoz

This game consists of extremely simple questions, asked in a very fast pace, making it very chaotic!

Highroller

A very simple game, Volrac gives a number and you need to guess if the next number is

higher, lower or equal to pass to the next round.

Donkeyz

This is a card game based on the dutch game **Ezelen**. maybe it has an english name, but i dont know that name. Normally cards are normal playing cards, and cards are always given to your neighbor. But since in chatgames many people can join. Its much faster to swap cards randomly. Objective is to get a 4 of a kind, then slam on the table as fast as you can, and everyone should slam along to stay in the game!

Special cards

Joker: replaces any card, so you dont want to trade that!

Block: Is totally useless and you just want to get rid of this

Bomb: Explodes when someone slams, making you eliminated - **this card is not used due to complaints.**

Woosh

Words can be formed out of other words for example by taking away letters or adding letters. that is exactly the game of Woosh, for example if you have the word **Feast**, we could remove the **e** and we will get the word **Fast**. We could also remove the **s** leaving the word **Fat** and then we could add the letter **r**, making **Fart**.

Schwootsh

This game is the same as Woosh, adding one rule, you can also change a letter!

Order This

This game is in a sense like bingo, but then a very fast version. You will get a bingo card containing number (or alphabet in some games). And then Volrac start with calling a **1**. Then when you have **2** on your bingo card, you need to say that as quickly as possible before someone else does, next up will be number **3**, etc.

Coinflip

A simple coinflip game, every round, guess if its going to be **!heads** or **!tails**.

Questor

This game is a popularity game, First Volrac asks you to join by saying **!quest** then every round questions will appear, and then the answers could be one of the people that joined. So it gives a multiple choice question, where all answers are persons. Most chosen person wins the popularity test, and the best voter wins the Voting test.

Warzone

A Team WarGame. people need to join by saying **!yes sir**. like if you were in the army, then Volrac will split you up in teams of 3. You can attack other teams in 2 ways: **!snipe teamname** or using **!grenade teamname**. sniping will hit only 1 person in a certain team, while grenade can hit all 3 people, although will have less impact on people. Then there is the **!hide** command which prevents you from being hit.

Volrac says

A game like Simon Says, When Volrac says a certain command, people should follow, when someone else says the command, then everyone should stay quiet.

Alpha Time

A game also found on getsatisfaction:

http://getsatisfaction.com/omgpop/topics/new_chatroom_game_alpha_time. Idea was created by iNViNCiBiE. Its very simple, Volrac says a few letters, and you need to come up with a word containing those letters within the time limit.

Alpha Fuse

Alpha Fuse is a combination of Alpha Time, and Defuse, giving you extra lives to the game. This is set to 3 lives most of the time.

Alpha War

Alpha War is a more competitive version of Alpha Fuse. Everyone starts with 1 life, If a person the succeeds to make up a word that will Eliminate allot of people they get an extra life per kill, (this doesnt include losing lifes, only eliminations).

Avalanche

Ski blindly down a hill, avoiding all trees and all fences. It will show how many seconds you are away from impact. Saying **!left**, **!right**, **!sharp left** or **!sharp right**. makes you turn in a certain direction.

Dodgeball

Two Teams are made, which will then play dodgeball against each other, the team that still has at least 1 person standing, wins the game. When a ball is thrown, people can **!catch** the ball or try to evade it by using the other commands. When catching you take a risk of getting eliminated though, since when 2 or more people say catch in a team, then they will collide making them eliminate.

Whack a Mole

This is a chaos game, not like the game Chaoz mentioned earlier, but it will go like this. First round people can apply to be a mole. If so then they will appear randomly along the game, and people need to slam them by saying the command. When a mole hides back (which doesn't happen often) then the command is out of use as well. This will be very fast though!

Rhyme Time

Every round Volrac gives a word, and you need to come up with words that rhyme with it. the more syllables and letters you use, the higher the score is!

Hide 'n' Seek

First as introduction Volrac will give you a chance to join the hiding game by saying **!hide**. then he will pick a certain amount of seekers, these vary depending on how many people are playing. So there are 2 types of players **hiders** and **seekers**. they can both go to rooms the same way, the only difference is, at the end of the round all hiders that are in the same room as the seeker, will be "*found*". The hiders win, when at least one of them is left. And the seekers win, when they eliminated every hider.

Hammertime

This game is a “peek behind the curtains” game, When volrac turns around to watch, you all need to **!stop**, since Volrac doesnt want to see you move, else he will hammer you, making you get eliminated!

Chairisma

Based on “Musical Chairs”. You all need to sit down on a chair, so Volrac gave every chair a number. your job is to sit on a number that isnt said by someone else, when the music stops!

Fleet Fighter Extreme

Also known as **FFX**. this game is just playing Battleship blind. It is a team game, to join you must say **lahoy matey**. And you be given a teamname, you are staying on that boat. Then people will just start attacking squares of where they think there are boats.

Special Attacks

Rocket: This attack is launched in the same way, but it just gives a bit more power

Big Boom: This attack will Nuke a certain area, instead of only one spot.

Draw This Thing

A blindfolded drawing game, Volrac gives you instructions, when following 100% correctly, Your drawing will be exactly the same as what Volrac had in mind! and then you will win the game of course.

Hang My Thing

You enter like in Mix My Story, by giving a secret word, this time people need to guess the word HangMan style!

Taipoe

This game is all about finding typos in a big chunk of text. When found correct it as fast as possible to gain most points.

OMGIFE

This game also played by Panda, is using user-created stories. Just vote for commands, and see how the story takes different plots and turns everytime! And yes when doing different commands a story can get twisted around allot as well.

GWAR!

Gwar is a card game based on the game Eleusis. It's a game where noone initially knows any rule on which cards Volrac rejects and which cards Volrac accepts. So its up to you to find out all the rules and lose all your cards, to win the game!

Uddercode

This game is based on certain version of mastermind, where bulls represent numbers which are in the code and in the correct place and cows represent numbers which are in the code but not in the right place.

Example: the code is: **1644** then saying **!guess 1234** would yield 2 bulls and 0 cows. since in both **1644** and **1234** we see that the 2 green numbers are in the correct place, so 2 bulls. If we then would say **!guess 4841** then this would yield 1 bull and 2 cows. cause as you can see in both **1644** and **4841** we see the green parts are in the correct place, so 1 bull. And also notice there is a **1** and **4** still in the code, but not in the right place, yielding 2 cows.

Pass That Hamster

Also known as **PTH**, this game is a bit like hot potatoe. You will get an exploding hamster and you need to pass it quickly to someone else randomly before time is up. else you will be eliminated.

Mutany!

A card game where you steal cards from others by saying **!steal** also if you got double cards you can remove them by saying the card you want to remove like **!poop**, **!shoe**, **!telephone**, etc. Then there is one rule left, To win a round you must have only 1 card left which is the

parrot (you can also end with multiple parrots). When this situation occurs quickly say **!parrot** to win the round. Also this will make any bomb in the game to explode. Also to it will make all people that have no cards left to be eliminated. So try to get the parrot without losing too much cards, would be a nice strategy. Also to lose a bomb, you need either another bomb so you can drop it, or wait for someone to steal it.

SharkBait!

This game is like the inverse of Questor. People will now not vote on who to win, but they will vote on who to eliminate. Giving suprising winners at the end!

The Price Is Right

This game is about guessing the price of certain objects shown as good as possible. nothing more than that, please note that for this game you must use a \$ instead of a !.

PartyPooper

You are on a friday night party, and you get chances to be the worst partyer, in other words the partypooper, Every round there will be voted. The people who voted on the thing with the least votes, dont join the party, so they are the party poopers. Continuing in this fashion only one person will be left to poop the party!

Most Useless Game Ever

Every round Volrac shows a word, and every word has a some useless combinations. but the formula behind this is as mysterious as peeling off onionskins with your toes.

HawtDawgs

There is a hotdog eating contest, the first command is !chew, when you say this command between 3-4 seconds from each other you get a combo and a new command to eat even more hotdogs! Also you get a time bonus!. Saying a command after 4 seconds from each other, will make you lose the combo.

Egghunt

Originally an easter game, rooms are like in Hide N Seek, just now we need to find eggs in the rooms. Just by going into a room every round. Although of course when more eggs get removed the harder it gets to find them.

PickleJar

PickleJar is a simple Guess the answer game. You guess a number, and volrac tells you if its yoo high or too low. Then the next round you can guess another time

Russian Roulette

Ultimate version of shootout, you just play against each other not 1 by 1, but all at once. Not all guns work though, But some of them do. If you shoot and the gun has a bullet then it will hit the next person who tried to shoot. Else nothing happens until u got to reload.

Fourplay Extreme

Teamed Version of Fourplay, Actually not hard to understand if you know the real game of fourplay.

Pow Racer

This is a more individual game, since you will get a PM showing words, objective is to type these words as fast as possible. to get combos and timebonusses.

Risky Pig

Risky Pig is often confused with Greedy pig, while both are different games, but in both games being too greedy can only get you the highest scores. Every round Volrac will start an offer at 1 point. This gets higher every few seconds. Until a bomb appears. If you took already an offer before a bomb comes, then its not necessary to defuse a future bomb in the same round. If you didnt take any offer yet, you need to quickly defuse the bomb to stay alive. If this bomb was a fake bomb, then you might be lucky and also new higher offers can come forth from that.

Hypocrite

This game is based on my definition of the word hypocrite: *"Someone who accuses people of a crime, while they do the same thing themselves."* Every 10 seconds people are going to accuse other people of something. Now according to the definition, you can't accuse other people of things you did as well, since we can't check that, we deviate a bit from the definition and make it like this: If an other person accused you of stealing cookies. And then you want to accuse someone of stealing cookies, You are called a hypocrite. Also the other way around counts: If you just accused someone of pooping next to the toilet, and then an other person accuses you of that. You are also a hypocrite. Last person not being hypocrite wins.

Acronym Soup

A bit like Rhyme Time when it comes to gameplay. Every round an abbreviation is given, and it is up to you to guess some definitions. The most famous ones are worth more points.

Guppelwoop

You are a seamonster called a **guppel** and you need to **woop** other fishes on your path while racing towards the finish. the faster you defeat a monster, the faster you will get to the finish as well.
